

# Introducing... a NEW and IMPROVED IgG FOOD INTOLERANCE TEST

Gamma-Dynacare is pleased to introduce a revolutionized method for food intolerance detection and treatment - the Genarrayt™ 200+ Foods IgG test.

## Advantages of the new 200+ Foods IgG test

- It measures over 200 individual food types simultaneously.\*
- We offer 2 panels (120 and 200) to fit your budget and food preference.
- When you order the smaller panel and the results are positive, you can upgrade to the larger panel and just pay the price difference.
- It has greater sensitivity, which results in better structural detection of the food antigens.

### Composition of the Food Test

Meats	16
Fruits	43
Vegetables	44
Fish	38
Grains	18
Nuts	10
Others	57

*\*(See back for list of foods and comparison of the old and new IgG tests.)*

## CONTACT INFORMATION

If you like to order or learn more about this test, call **1-866-790-3515 ext. 5153** or email [alternativemedicine@gamma-dynacare.com](mailto:alternativemedicine@gamma-dynacare.com).

*This test is not intended to replace medical advice. It does not diagnose allergies. Any proposed changes to your diet should be discussed with your GP or other health professional.*
